SACHSENKÜCHEN

Sachsenküchen stands for quality, individuality
and a harmonious interplay of architecture and application.
Our unique selling points and our latest innovations ensure kitchens are
even more individual, higher quality and more contemporary.
We closely follow trends such as sustainability, resource conservation
and timeless design – and always consider kitchens in context.

The goal: creating spaces that feel tailor-made – for people,
for ideas, for everyday use.

COM PANY

We have been designing and manufacturing high-quality kitchen furniture for over 100 years – with an eye for detail and a sense of practicality. What began with furniture production in 1908 developed into one of the leading kitchen manufacturers in the 1930s. Today, Sachsenküchen is a reliable partner on the German and International market – thanks to continuous development, high manufacturing quality and committed employees.

SUSTAINABILITY DRIVES US – AND DRIVES US ON

Sustainability is reflected not only in our materials and processes but also in our attitude.

We think in a resource-saving way, act responsibly and invest in people:

in education and training; in craftsmanship and innovation.

This is how lasting quality is made – and a future sustained.

9

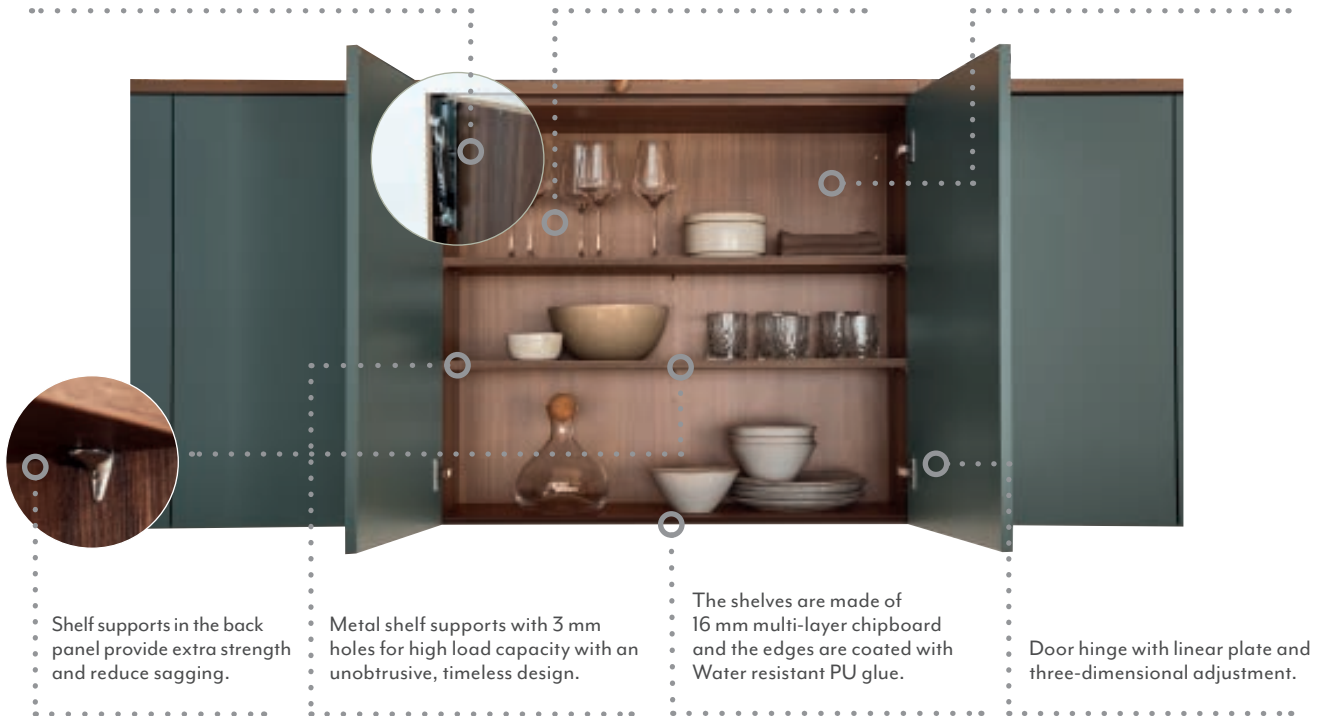

TALL CABINET
CARCASE HEIGHTS

A GOOD CARCASE IS THE CORE OF EVERY GOOD KITCHEN

Concealed hanging adjustment fittings are barely visible, while anti-lift devices ensure safety and ease of use in daily operation. The three-dimensional adjustment guarantees perfect alignment.

Plenty of creative freedom thanks to more than 20 carcass finishes with identical decor inside and out.

5 mm thick, rebated and screwed MDF back panels in the chosen finish visually enhance the carcass and ensure maximum stability.

WOOD CORE PLYWOOD CARCASE

CHIPBOARD

Coarse chip middle layer

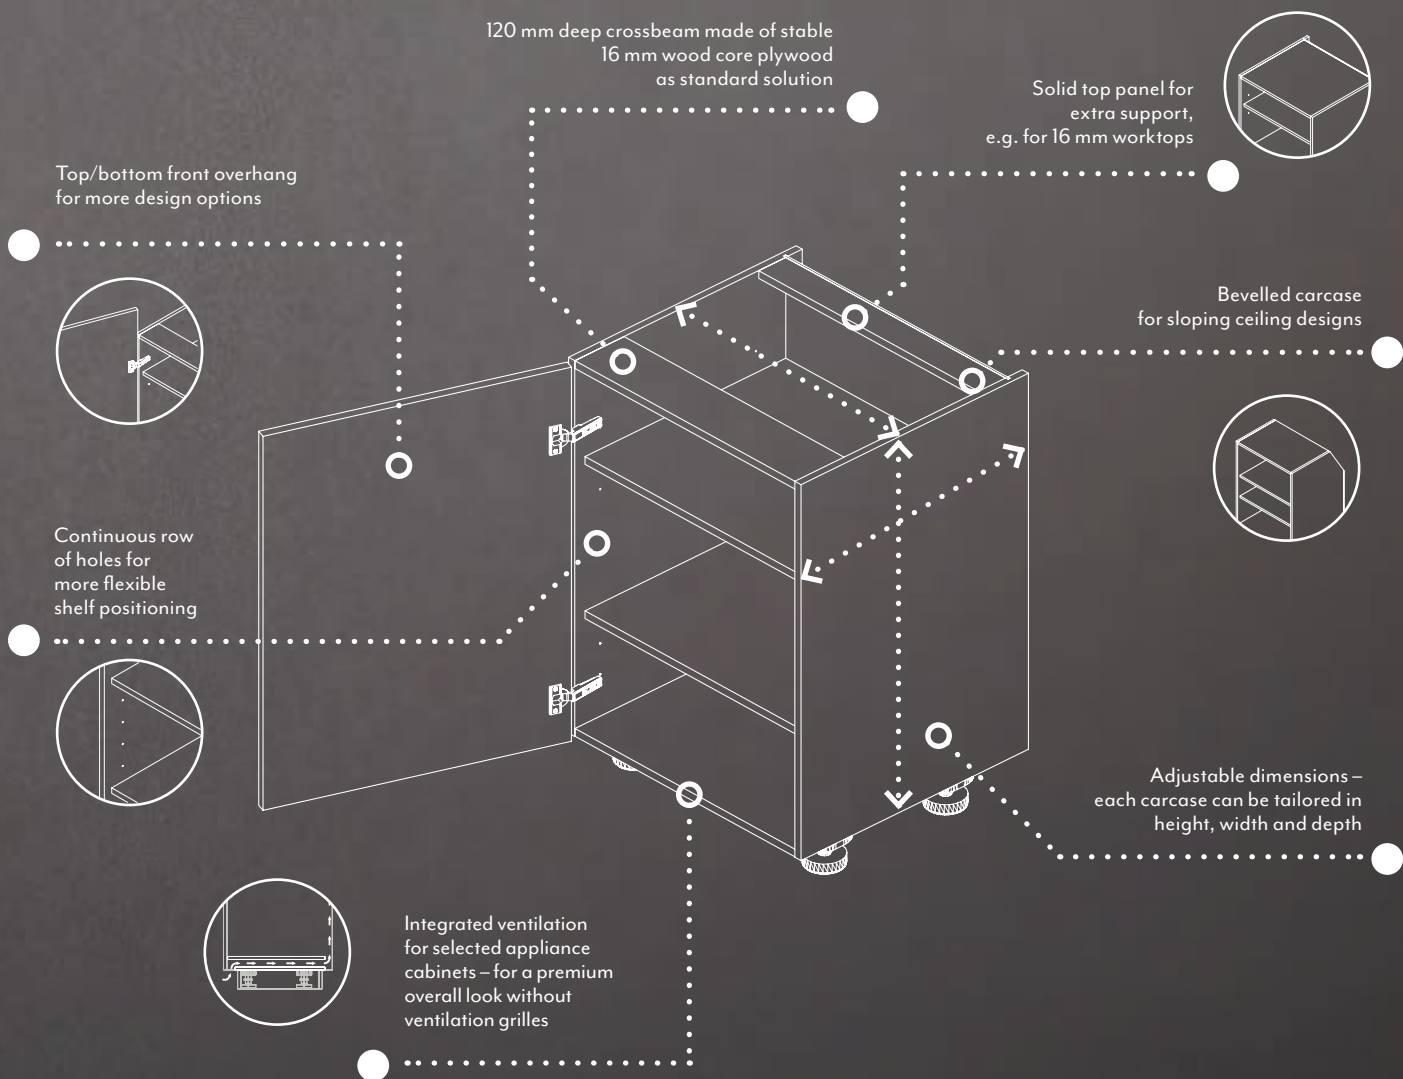

Fine chip top layer

WOOD CORE PLYWOOD

Parallel-aligned, fully glued spruce and fir slats form the core of the board and deliver its outstanding properties.

The fine chipboard top layer creates a smooth, uniform texture and forms the basis for a perfect furniture surface.

Stability meets style: Our impressive wood core plywood carcass delivers 3.5 times the bending strength of conventional chipboard, with less weight. New colours ensure a fresh look; technology ensures tangible quality. Perfect for everything that lasts and lasts and lasts, day after day.

ACCURABOX

6

DIFFERENT
CUSTOMISATION
OPTIONS

Now standard: the AccuraBox – an elegant drawer system with clean lines, optional LED lighting, and wood-design facings. For maximum function and flawless appearance – without any visible drilling.

CONCEALED FITTINGS

Concealed technology meets stylish transparency:
whether on hinged doors or flaps, the delicate glass-frame cabinets impress with cleverly
integrated fittings and thoughtful details that give the design a calm, premium appearance.

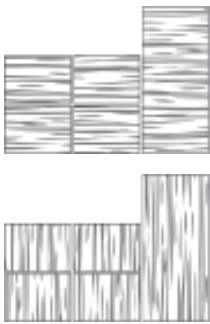

CONSISTENCY

Cabinet interior in colour throughout.
With the new interior concept, the clear design of the AccuraBox
now extends to pull-out and service elements – creating a harmonious
overall look down to the last detail.

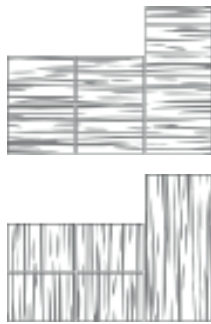

SYNCHRONISED GRAIN

On request, we can manufacture our furniture so that the grain flows seamlessly across multiple fronts – whether melamine or veneer.

Without grain continuity

With grain continuity

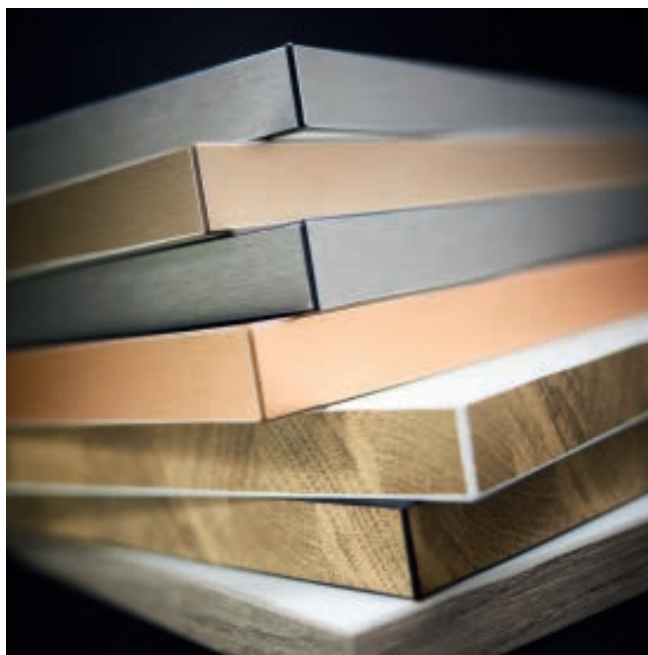

FRONT OVERHANG

Whether above, below or to the side, front overhangs can be flexibly adjusted. They conceal the plinth area or lighting elements, if desired, while also serving to open the front.

VARIOEDGE

The different edges give each front a unique character. VarioEdge allows countless combinations – from metal or glass to wood finishes – creating bespoke design possibilities down to the smallest detail.

VARIABLE FRONT ADJUSTMENT

The variable front adjustment integrates appliances seamlessly into the front view without unnecessary interruptions – creating a calm, continuous appearance that showcases the finishes to full effect.

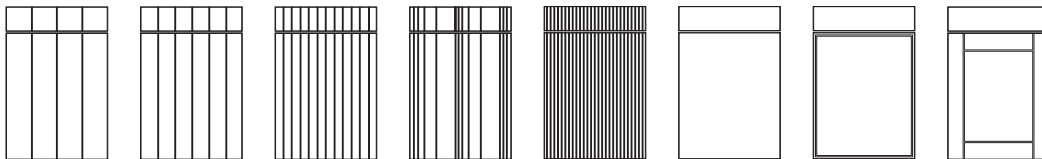

Without SMARTFIT

With SMARTFIT

WOODLINE

The choice and combination of wood type, surface texture, stain colour and model creates endless variety in form and colour.

Wood type

The choice of wood sets the tone for the character of the front. Versions with more knots and cracks look more lively and intense.

Front design

Smooth veneer with horizontal or vertical grain, different grooves or solid wood frames – all available in bespoke sizes.

Stain

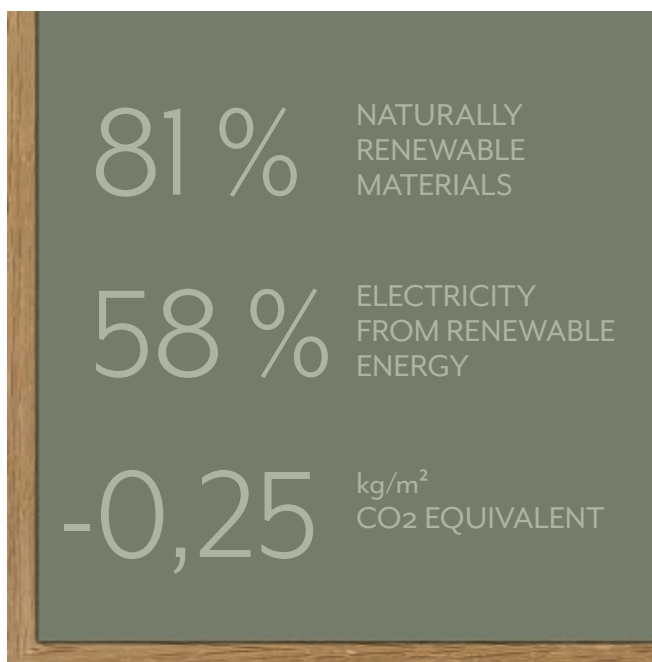

Natural or coloured stain, light or dark, or coloured lacquer – both our standard colour palettes and the option of custom colours make it possible to realise a wide variety of colour choices.

Surface texture

By working the wood with different tools, varying amounts of material are removed to emphasise the grain. The chosen wood type also affects the resulting look and feel.

LINOLEUM

Linoleum for kitchen fronts combines ecological responsibility, aesthetics and functionality. This natural product consists of domestic, predominantly rapidly renewable materials such as linseed oil, resins, wood and limestone flour, and natural pigments. It impresses with its natural elegance, a warm feel, refined matt surfaces, resistance to fingerprints and easy care.

COLOUR CONCEPT

These subtle, smoky, homely colours come with perfectly graduated companion shades. In 3 levels of intensity and 15 naturally vibrant tones, they offer endless, always harmonious combinations.

Custom colours in RAL, Sikkens, NCS and Farrow & Ball can also be realised – for maximum design freedom and perfect coordination with any interior concept.

ERGOMATIC

Good design adapts to you – not the other way around.

Today, cooking is a family affair, bringing together a range of heights, working styles and needs. Fixed worktop heights often force compromises – which over time can lead to back pain or tension.

This is where our ergonomic solutions come in: height-adjustable systems, smart planning heights and technology that moves at the touch of a button ensure that every person can find their optimal working height. This makes kitchen work more comfortable, healthier – and a real pleasure for everyone.

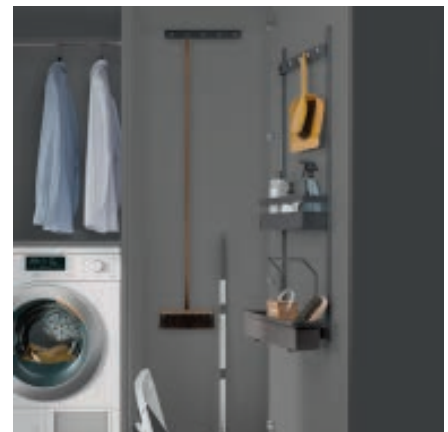

UTILITY AREA

Whether as a separate area, room-in-room solution or elegantly integrated storage space – these planning options ensure that everyday essentials are always within easy reach while remaining discreetly in the background.

NEW

Practically planned: the new interior design for the utility area impresses with height-adjustable elements and a dark design that blends harmoniously into the overall collection.

DESIGN ELEMENTS

shelving systems

panel wall system

sliding door system

passage door

pocket door

bi-fold door system

DecoraBox

From open shelving systems to cleverly integrated doors: the diverse design elements offer space for individual planning – functionally well thought-out and harmoniously embedded in the living concept.

Lacquers

Nature and its infinite variety of colours were the inspiration for the colour palette. Understated, smoky, homely colours have perfectly graduated colour relationships that offer endless, constantly balanced combination options in three saturation levels and 15 natural-looking, vibrant colours, serving up completely new perspectives on modern design.

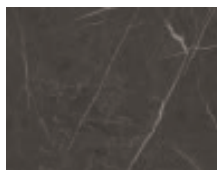

All colours are available as matt lacquer, textured lacquer, premium matt lacquer and high-gloss lacquer.

Carcase decors

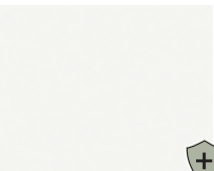

The standard body consists of 16-mm multi-layer chipboard with a concealed suspension adjustment fitting including safety catch. The 5 mm thick MDF rear panel is folded and screwed in, the outer edges are sealed, and the shelf support only requires 3 mm holes. The body has an attractive look thanks to its matching styles on the inside and outside.

THE DIGITAL SALES MANUAL

As an online platform and app, it saves space, avoids reprints and offers a fast, convenient search for information – contemporary, sustainable and easy to use anywhere.

Your benefits:

- Additional information directly on the article
- Large display of all products and examples
- Colour recommendations for harmonious combinations
- Display of optional and mandatory additional items
- Assembly instructions linked to the article
- Full-text search for quick information finding
- Access to the image database
- Configuration validation
- Display of the item price per configuration
- Automatic updates and additions
- Optimised for use on a tablet

Here's how to do it:

1. Scan QR code
2. Click on “Register”
3. Fill out the registration form
4. Get access data, get started
